Junior Accountant / Financial Analyst

Description

LEVEL:	EXCLUDED
SUPERVISOR:	DIRECTOR OF FINANCE
RANGE:	\$60,000.00 – \$70,000.00

GENERAL PURPOSE:

The Junior Accountant / Financial Analyst supports Rogers Foods' day-to-day accounting activities, financial reporting, and financial analysis. Working under the guidance of the Director of Finance and Corporate Controller, the incumbent assists with reconciliations, month-end and year-end close activities, budgeting, forecasting, and the preparation of financial analyses and reports. The role contributes to accurate and timely financial information, supports operational decision-making and continuous improvement, and provides backup support across the accounting team as required.

Qualifications

- Bachelor's degree in accounting, finance, business, or a related discipline.
- Enrolment in, or active pursuit of, the Chartered Professional Accountant (CPA) designation.
- One to three years of relevant experience in accounting, finance, or financial analysis.
- Strong analytical, problem-solving, and quantitative skills.
- Strong proficiency in Microsoft Excel, including formulas, pivot tables, and data analysis
- Knowledge of Microsoft Dynamics 365 Finance & Operations and Power BI is considered an asset.

Responsibilities

- Supports month-end and year-end close activities, including analyses, reconciliations, and the preparation of supporting schedules.
- Assists with audit preparation and responds to auditor inquiries as required.
- Provides backup support across the accounting team, including accounts payable and accounts receivable, during vacations, absences, or periods of increased workload.
- Supports annual budgeting, forecasting, long-range planning, and the development and maintenance of financial models and operating plans.
- Prepares financial analyses, variance explanations, and management reports under the guidance of the Director of Finance and Corporate Controller to support business decisions.
- Assists with preparing and maintaining analyses of product costs, customer profitability, margins, operating costs, and key financial and operational performance indicators.
- Uses Microsoft Dynamics 365 Finance & Operations, Excel, Power BI, and other financial tools to analyze information and improve reporting, controls,
