Journeyman Millwright

Description

The Journeyman Millwright is responsible for assisting in the overall maintenance of all plant facilities (equipment, buildings, and roads). The incumbent will also be responsible for repairs and maintenance of existing equipment and installation of new equipment throughout the plant.

Qualifications

- Grade 12 or equivalent.
- Journeyman Millwright Certification.
- Level 1 First Aid.
- Previous maintenance experience in an industrial setting.
- Available for shiftwork including weekends, holidays and call outs as required.

Responsibilities

- Works with other departments of the Company to ensure that the maintenance jobs get completed with the least amount of production disruption.
- Receives and prioritizes work orders from plant personnel for effective implementation.
- Works with other plant supervisors to train operational staff in the preventative maintenance functions of their departments' equipment.
- Assesses the condition and need for maintenance of all physical assets of the company, excluding computer and telecommunication equipment.
- Records maintenance completed and associated expenses on computer and issues reports as required.
- Make recommendations for major overhauls, improvements, and replacement of equipment.
- Conducts hands-on maintenance.
- Installs new equipment.
- Operates forklifts and other company equipment.
- Is aware of critical control points as they relate to product liability.
- Responsible for compliance with Canada Labour Occupational Health and Safety requirements and company safety standards.
- Carries out additional duties and projects as assigned.
- Follow Good Manufacturing Practices (GMP's) while performing tasks in production areas.
